Professional Training to Enhance Proficiency of Project Personnel

Today's construction projects require personnel who are proficient in their roles so as to achieve time bound completion with good quality and controlled cost. Not only are they required to possess modern engineering and computational skills in their core areas, but they are also expected to have good understanding of other interdisciplinary areas. While such proficiency is difficult to find, it can be imparted through regular training in the desired skills.

Dhargalkar Technoesis (I) Pvt. Ltd. is a consulting organization with more than 25 years' experience in Construction Industry. Technoesis is accredited by Consultancy Development Centre, DSIR, Ministry of Science & Technology, Government of India. One of our key functions is to organize Professional Training Activities, with a view to build a strong professional foundation and to update the professional knowledge and skills based on the latest technological and computational advances. We have already imparted more than 20,000 man-hours of professional training to engineers across India.

Currently we offer the following Programs for Developers/ Contractors:

A] Construction Engineering & Management

1. Construction Engineering & Management (6 Modules)... 12 Days
